Streets for everyone

ST Mayer, Director of Public Health

COUNTY OF SAN MATEO
HEALTH SYSTEM

complete
centered

safe people
sustainable green
healthy
all

A “Complete Street” is a street designed for people

- Older adults
- Parents with strollers
- Teenagers walking in groups
- Kids and adults on bicycles
- People walking to the grocery store
- People in wheelchairs
- People with walkers
- Kids on scooters
- People walking their dog
- Couples holding hands
- Parents holding their kids’ hands
- People in a rush
- People window shopping
- People driving through

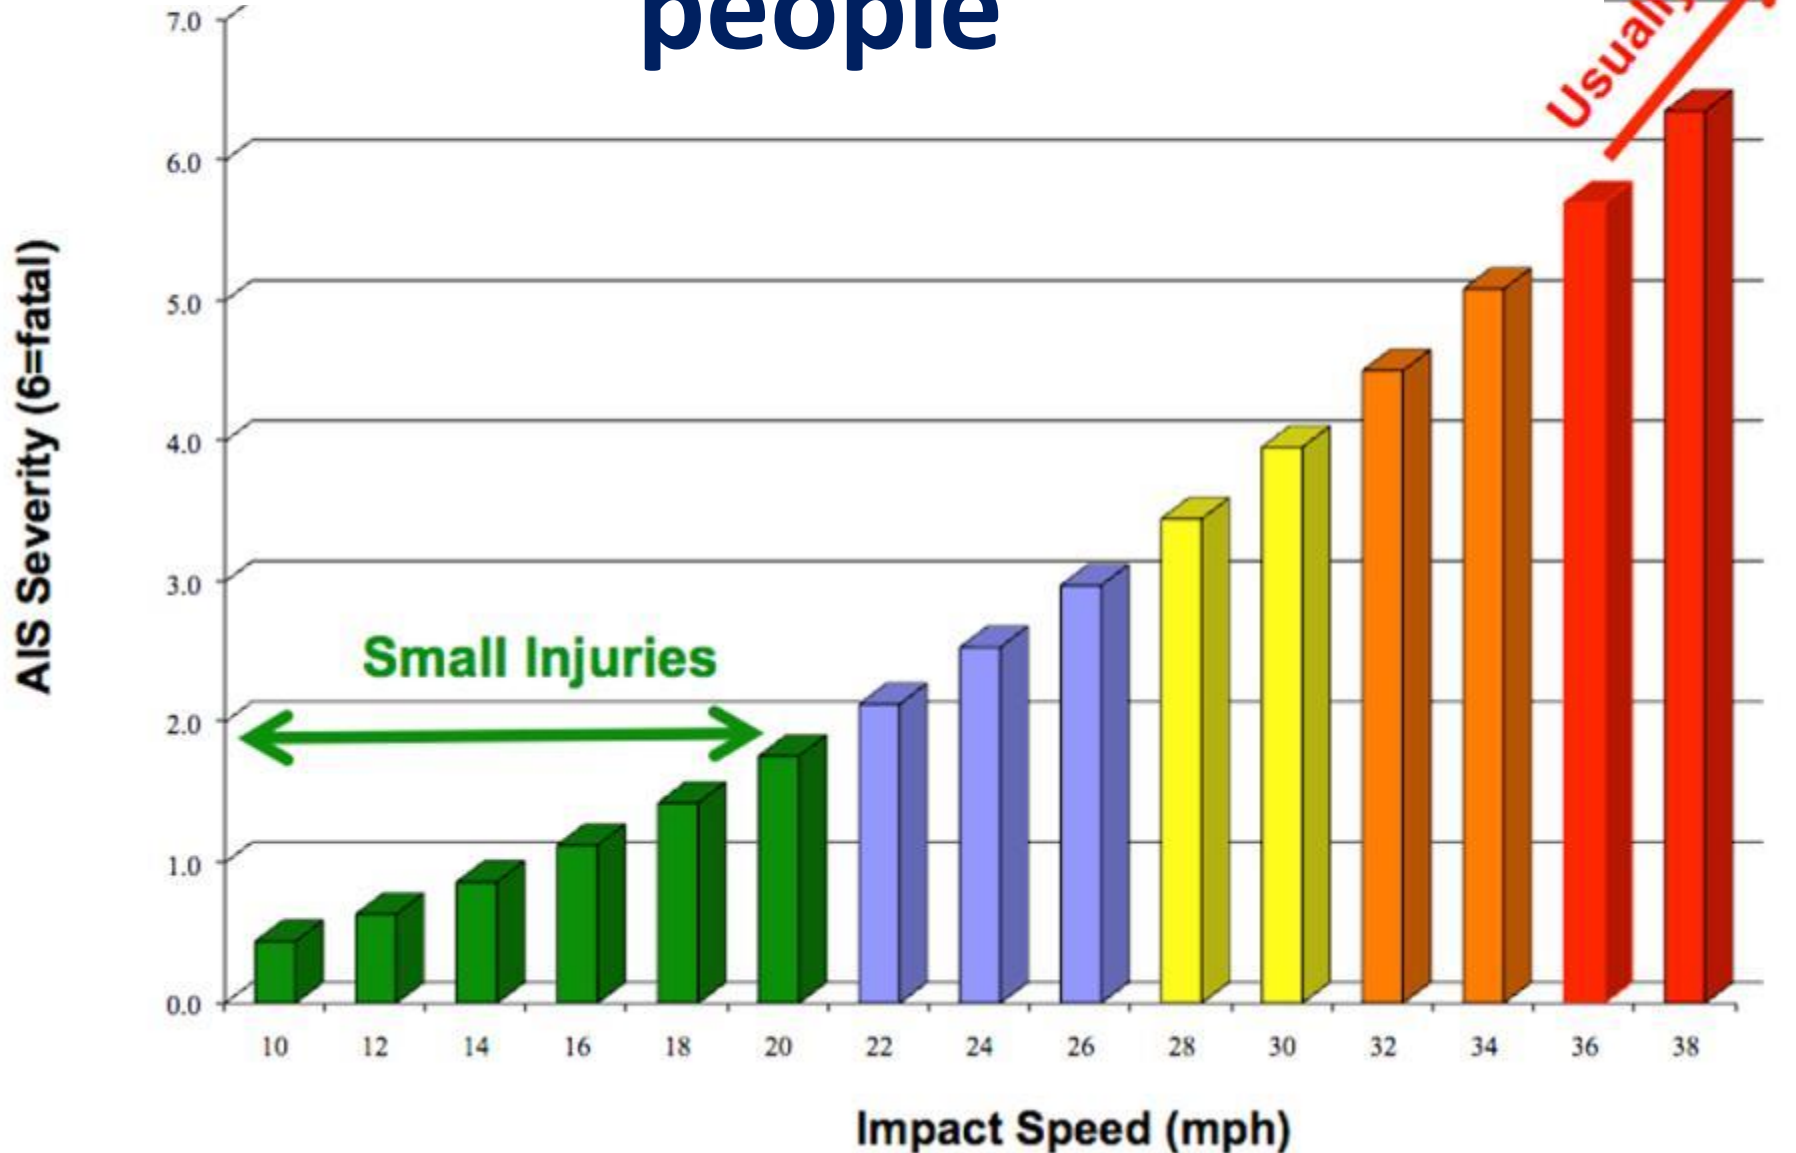

We have adopted policies which design streets for cars; not people

Image source: Dan Burden

Many of our streets kill people

Many of our streets injure people

Across San Mateo County,
nearly **500** bicyclists and
pedestrians are injured
every year.

Our streets shape behaviors

- Residents are 65% more likely to walk in a neighborhood with sidewalks.
- People who live in walkable neighborhoods get 70 minutes more physical activity per week than people who live in non-walkable neighborhoods
- People who live near public transportation are 5 times more likely to commute by transit than other residents in the same region

Streets should be great public spaces

What would YOUR GREAT STREET look like if it were designed for people?

Adequate, unobstructed pedestrian path

Pedestrian Realm

- B1-7 Create 10-foot-wide sidewalks with an unobstructed contiguous 4-foot-wide path for pedestrian travel.
- B1-8 Locate bulbouts at key intersections that can be designed for multiple uses including temporary plazas, outdoor dining, bus stops, and other uses.
- B1-9 Install pedestrian-scale lighting (approximately 12 feet high) along Middlefield Road to provide a safe and inviting environment.
- B1-10 Install benches, trash receptacles and other streetscape amenities at key nodes along the entire length of Middlefield Road.

- B1-11 Install lighted mid-block pedestrian crossings at appropriate locations on long blocks.

Health and Identity

- B1-12 Provide vertical gateway features such as sculptural pylons where Middlefield Road meets the boundary of North Fair Oaks at Encina Avenue and as Middlefield Road crosses the Dumbarton railroad tracks.
- B1-13 Incorporate art in the design of streetscape elements such as plazas, paving, transit shelters, shade structures, and other elements.
- B1-14 Explore opportunities to create pocket plazas on pedestrian bulbouts.

Proposed Middlefield Road streetscape improvements at intersection (All street sections for Middlefield Road represent potential configurations of a three-lane roadway, and the types of improvements contemplated for Middlefield Road. Other options include protected bicycle lanes, lesser amounts of diagonal parking and greater amounts of parallel parking, and others. Configurations would depend on the amount of right-of-way available in particular sections of roadway, the type of improvements made to the roadway, and other factors).

Middlefield Road Conceptual Design

Adopted by San Mateo County Board of Supervisors - October 2014

Three Lanes • Bike Lanes • Wider Sidewalks • Parallel Parking
